Engineering is at the heart of what makes London great. Engineers work on projects that drive London’s economy and make the city a better place to live and work. The challenges are complex – transport, air quality, water security, sustainable drainage, energy efficiency, climate change resilience, housing… the list goes on.

Engineering firms also contribute through corporate social responsibility. Yet while CSR commitments may be set, they don’t always have access to groups who could benefit. London communities, while vital stakeholders in regeneration and infrastructure projects, are often overlooked in decision-making. This can lead to conflict and lost opportunities.

Community capacity to engage with planning and engineering processes can be undermined by a lack of access to independent technical expertise. Members of the public might not have a clear understanding of what engineering can offer their community.

We need to grow pro-bono engineering advice to London’s communities.

Who we are

The Engineering Exchange at University College London is a non-profit social enterprise linking engineers with community groups in need of technical assistance. We work together to answer questions and deliver solutions based on two-way knowledge exchange. Community groups and engineers approach us with ideas for projects, and we find the skills and experience to meet the need. We have a proven project management system to coordinate the initial ‘match-making’ and project scoping, as well as overseeing project deliverables as they develop.

Launched in October 2014, our community network has grown so that we can no longer meet the demand for our services. We are seeking to expand our operations to partner with industry and other universities to meet the needs of London-based groups seeking to improve their communities.

Engineers have valuable skills. Let’s use them to help make London a better place.
Building a Better London

Join the Engineering Exchange and put your skills to work to help local London communities!

We are offering the opportunity to become a member of the Engineering Exchange, London’s pro-bono engineering network. Membership benefits at all levels include the opportunity to work with a world-recognised university to improve community access to technical expertise and fulfil your CSR and Continuing Professional Development (CPD) requirements.

| Gold   | £10,000        | - 20 days of project work with local London communities  
- 30 hours of project support from the Engineering Exchange  
- First choice of available projects  
- 20% discount on our CPD training courses  
- Bespoke CPD training offered at your premises with 50% discount (min. 6 participants)  
- Social media promotion, regular news posts and a dedicated page on our website detailing your CSR work |
| Silver | £5,000         | - 10 days of project work with local London communities  
- 15 hours of project support from the Engineering Exchange  
- 10% discount on our CPD training courses  
- Bespoke CPD training offered at your premises with 50% discount (min. 6 participants)  
- Social media promotion and news posts on our website detailing your CSR work |
| Bronze | £1,000         | - 3 days of project work with local London communities  
- 5 hours of project support from the Engineering Exchange  
- Bespoke CPD training offered at your premises with 50% discount (min. 6 participants)  
- Social media promotion and news posts on our website detailing your CSR work |
